Plaskett, H H [President, Mathematical & Physical Society, Univ. of Toronto] April 1915

President's Office.

April 27th, 1915

Mr. H. H. Plaskett,

President, Mathematical and Physical Society,

University of Toronto.

Dear Sir:

I recognise the value of such a publication as you propose and if the papers are carefully edited so that nothing would be issued that would not be a distinct credit to the University the publication would be encouraged. I will bring the matter before the Governors when the estimates are being brought up, though this year I fear very much whether it would be possible to make any new grants. We are cutting down rather than adding at present. However, I will have it discussed by the Committee.

With kind regards, I am,

Yours sincerely,

Robt. Falconer

President.
